the African husbandman is the fundamental problem of inter-tropical Africa itself. As the author points out 'Over the region as a whole nearly 90% of the people are still employed in the rural sectors of the economies, mostly

THE AFRICAN HUSBANDMAN

In this study of typical African systems of land-use the author sets out to calculate the critical density of population for each of the chief regions south of the Sahara. Using his own formulae he shows that when plantation farming, industries, and improved medical services combine to produce a rapid growth of population, the land problem finally becomes critical and that it can be predicted...
